Green CowSafe Cubicle

The revolutionary new cubicle system that delivers the freedom of the outdoors, indoors. The Green CowSafe Cubicle provides better housing conditions for cows. Cost of health care and breeding will reduce and production will increase.

Features:

- Consists of flexible plastic tubes compared to traditional fixed metal rigid loops
- Front and sides remain open providing freedom of movement into and out of the cubicle
- Easy to install and adjust
- Can be easily adapted to fit existing system infrastructure

Advantages:

- Flexible, so the cow will no longer get injured.
- Fits to the size of the cows, so that the cow lies perfectly in the cubicles
- More spacious, allowing the cow to lie down quicker and stay there for longer periods
- Reduced healthcare & veterinary costs
- Increased resting time, leading to higher milk production
- Increased cow welfare, can result in more milk production and more value for money
